BRITT MIDGETTE

EXPERIENCE DESIGN DIRECTOR | CREATIVE + PRODUCT DESIGN LEADER | AI-NATIVE PRODUCTS
& EXPERIENCES | UX STRATEGY | DESIGN SYSTEMS

PROFILE

Experience design director and creative + product design leader working at the intersection of business strategy, customer experience, product design, creative and technology. Led UX strategy, product design, creative direction and design systems for enterprise programs and brands including Samsung, Levi's, Under Armour, Bose, CompTIA and ADM. Designs and builds with AI every day, shaping AI-enabled design-to-development workflows and taking AI-native products from idea to working, live product.

WORK EXPERIENCE

Founder

Artifact Digital / San Diego, CA (Remote) / May 2026 - Present

- Founded a software and design studio delivering websites, web/mobile apps, SEO/GEO, AI-enabled products, and ongoing support.
- Own project budgets, SOWs, scoping, staffing decisions, and delivery across engagements ranging from \$2.5K to \$75K+.
- Lead engagements from strategy through design and development, applying AI where it creates practical production value.

Co-Founder & CEO

DropQ / San Diego / 2026 - Present

- Co-founded and lead a live marketplace for timed product drops, storefronts, ordering, payments, and fulfillment for independent sellers.
- Own strategy, positioning, pricing, product design, development, and the operating model from concept through launch.

Experience Design Director

Valtech / San Diego / Aug 2020 - May 2026

Led experience strategy and design across complex enterprise digital programs at the intersection of business strategy, customer experience, product design, creative and technology.

- Led UX strategy, product design, creative direction and large-scale digital transformation initiatives.
- Led and mentored multidisciplinary design teams; scoped engagements, identified skill and staffing needs, allocated designers across accounts and supported resource planning.
- Partnered with executives, product leaders, designers and engineers to turn complex business challenges into scalable digital products and experiences.
- Helped shape Valtech's adoption of AI for experience design and product development, evaluating emerging tools and identifying practical applications across design, prototyping and production.
- Developed AI-enabled design-to-development workflows using Figma design systems, Figma MCP, shadcn/ui and AI-assisted development to accelerate the path from design to working product.
- Created AI-powered prototypes and demonstrations showcasing emerging capabilities to clients.
- Led UX and design-system strategy for CompTIA across 22 components and 10–12 core templates, creating a reusable foundation for its digital ecosystem.
- Helped transform ADM's enterprise web ecosystem from 3,000+ pages to fewer than 1,000 using 12 scalable templates, a unified design system and an ecosystem spanning 60+ child sites.
- Established scalable design systems and partnered with technology teams from strategy and concept through implementation.

Lead Experience Designer

Valtech / San Diego / Jan 2018 - Aug 2020

- Aligned design, product, and engineering around shared priorities; owned design quality, consistency, accessibility, and review standards.
- Mentored designers and helped match team capabilities to project needs.

Senior Experience Designer

Valtech / San Diego / Jan 2017 - 2018

- Produced wireframes, flows, and prototypes as executable specifications and partnered cross-functionally through launch.

Visual Designer

Mirum (acquired by Valtech) / San Diego / Jan 2016 - 2017

- Evolved design systems and delivered developer-ready assets for clean handoff.
